To whom it may concern,

I am delighted to recommend Mr. Ye Cheng, who joined my team as an intern in the East China Channel Development Center, Industrial Ecosystem Cooperation Department, Cloud & Smart Industries Group (CSIG) of Tencent. As the Director of the Center, I had the opportunity to observe his work closely and guide him throughout his internship.

Ye Cheng impressed me from the outset with his strong professional competence and sense of responsibility. He quickly adapted to a dynamic environment, demonstrated initiative in tackling tasks independently, and consistently delivered results of high quality. His ability to learn rapidly and apply new knowledge effectively was evident in both daily work and project-oriented assignments.

Equally noteworthy are his excellent communication and collaboration skills. Ye Cheng worked smoothly with colleagues across different teams and departments, coordinating with both technical experts and business stakeholders. He was able to present ideas clearly, align diverse perspectives, and build consensus, which contributed significantly to the success of joint projects.

Beyond these qualities, Ye Cheng stands out for his solid understanding of computer science fundamentals and his potential for further academic growth. He showed curiosity and depth in engaging with technical topics and demonstrated an ability to connect theory with practical application. I believe this intellectual foundation, combined with his motivation and adaptability, will enable him to thrive in a rigorous postgraduate program.

In my view, Ye Cheng is a promising young talent who possesses the professional maturity, technical insight, and personal drive to excel in his future studies and career. I strongly recommend him for admission to your esteemed program. Please do not hesitate to contact me should you require any further information.

Sincerely,

XU Yongze

Director, East China Channel Development Center
Cloud & Smart Industries Group (CSIG), Tencent
